Nutech

▶ NXT Cool Zone

Available Sizes:
20 Litres

A revolutionary heat reflective coating for tile and metal roofs. Utilising thermal protection, the paint reflects the sun's heat and reduces indoor temperatures. The coating is drinking water safe, low VOC and has a high-gloss or low-sheen finish. Available in the entire range of 36 Nutech Colours.

▶ NXT AquaGuard

Available Sizes:
20 Litres

AquaGuard is a 100% waterproof, semi-gloss membrane specially designed for flat roofs. It is easy to apply, low VOC, high build, and has elastomeric properties. Suitable for metal, asphalt and concrete surfaces, it will stay waterproof during seasonal ponding. Available in the full range of 36 Nutech Colours.

▶ Anti-Corrosion Primer

Available Sizes:
20 Litres

Australia's best selling single pack metal roof primer. Providing excellent chemical resistance and top coat adhesion. Recommended for correctly preparing zinc, bare or galvanised metal, and weathered Colourbond surfaces. Apply using a brush, roller or airless spray equipment.

▶ Supa-Prime

Available Sizes:
20 Litres

Supa-Prime is an extremely tough, flexible, easy to use, environmentally friendly, water based primer specifically designed and formulated to maximize primer penetration into the surface of powdery, oxidized cement roof tiles.

▶ GP Primer

Available Sizes:
20 Litres

GP Primer is a general purpose primer with a high solids content, designed to be used as a filler coat on very rough or porous cement roof tiles. It helps to maximize and improve the overall appearance, gloss and coverage of top coats.

▶ Master Sealer

Available Sizes:
20 Litres

Master Sealer is a technically advanced high quality roof primer specifically designed to be used on stable cement roof tiles which do not have a powdery, oxidized surface after cleaning. It helps to maximise top coat adhesion and durability.

Nutech Paint

For a perfect finish!

▶ Tileflex

Available Sizes:
20 Litres

Tileflex is impregnated with self-cleaning nanotechnology and performs like no other roof coating. Providing significantly more gloss on application, it helps maintain the look of a new roof for much longer than a standard gloss acrylic roof coating. Drinking water safe, and also available in a low-sheen formula.

▶ Nuflex

Available Sizes:
20 Litres

Nuflex is a technically advanced, 100% acrylic, gloss or low-sheen roof and masonry surface coating. Designed to be colour fade resistant and non-yellowing, it guarantees maximum durability and performance under the most adverse weather conditions. Drinking water safe.

▶ Elite Terracotta Prime

Available Sizes:
10 & 20 Litres

A water based, solvent free primer, that enhances top coat adhesion and is developed specifically for glazed or vitrified terracotta tiles, and other surfaces where an absorbing primer is not suitable. It can be applied on both vertical and horizontal surfaces.

▶ Maxi Point

Available Sizes:
10 Litres

A viscous, ready-to-use water based roof pointing mortar that is easy to use and very flexible. Waterproof and durable, it is available in a range of Nutech Colours, and can also be painted to suit any old, new or renovated roof. Drinking water safe.

Additional Roof Coating Products:

NuPrime

Economical penetrating primer designed for powdery cement roof tiles and concrete surfaces.

Flexible Acrylic Membrane

High quality elastomeric coating designed for sealing and waterproofing roofs.

Asbestos Sealer

Cross linking alkaline curing sealer for asbestos cement sheeting.

Aqua-Stop Silicon Sealer

Impregnating sealer suitable for a wide range of cement and non-vitrified terracotta roof tiles.

Maxi Point Accelerator

Spray on surface curing accelerator for cold weather conditions.

Hypo Tile Treatment

Designed to kill moss, lichen and algae growth on roof tiles, concrete, masonry, and asbestos sheeting.

NuBond

Admixture for ridge cap bedding mortar and pointing mortar mixes.

Membrane SS Primer

General purpose primer designed to adhere to a wide range of roof and masonry surfaces.

EcoSafe Rust Converter & Inhibitor

Formulated to convert active surface rust on bare metal into a stable surface ready for coating.

Terra-Glaze

Clear protective coating designed and developed for porous, unglazed, non-vitrified terracotta roof tiles.

Accopol 847 Clear & Colour

Solvent based fine particle copolymer acrylic resin coating for concrete masonry, cement roof tiles, and steel structures. Suitable for cement, metal and asbestos.

Also Available: Tileflex Silver, Signal Red, Safety Yellow & Nuflex Matt Finish. Colour-matching Service for Tileflex and Nuflex roof coatings. HIPTITE (Ridge Capping Supports). Wet & Forget. Nutech Roof Wash. Flexible Flashings. Valley Irons. Maxi Point Bucket Boots & Trowels. Roof Vents. Gutter Guards & Tools. Airless Spray Equipment. Spray Hoses, Spray Tips and Accessories.

Keep your home 6°C to 10°C Cooler with NXT Cool Zone!

Sample 1:

A powdery, oxidized colour cement tile that has been cleaned, sealed with Supa-Prime, then finished with 2 coats of NXT Cool Zone in the colour "Charcoal". The sealer and two topcoats are applied at the coverage rate of 4 square metres per litre.

Sample 2:

A very rough, porous cement tile that was cleaned and sealed with GP Primer and finished with 2 topcoats of NXT Cool Zone in the colour "Black". The sealer and two topcoats are applied at the coverage rate of 4 square metres per litre.

Sample 3:

A stable cement tile that did not have a powdery, oxidized surface after cleaning. It has been sealed with Master Sealer and finished with 2 topcoats of NXT Cool Zone in the colour "Headland". The sealer and two topcoats are applied at the coverage rate of 4 square metres per litre.
